SAN TELEQUIP

USB to RS232 and USB to RS485/422 Converter. Model SC11

SC11 allows you to connect your Serial devices to a USB Interface. With data format auto detecting and baud rate auto switching function, SC11 is able to automatically detect the data flow and switch the direction of the data lines as well as to automatically configure RS422/485 signals to any baud rate without external switch setting. It is equipped with internal surge-protection on each data line. SC11 features high speed serial transmission and supports various O.S

It is self powered & does not need any power adapter
